

## Telemedicine Consent

Telemedicine is the delivery of healthcare services through the use of technology when the healthcare provider and patient are not in the same physical location. Providers may include primary care practitioners and/or specialists. Electronically transmitted information may be used for assessment, diagnosis, therapy, treatment, follow-up and/or patient education and may include the following:

- Patient Medical Records
- Medical Images
- Interactive audio, video and/or data communications
- Output data from medical devices and sound video files

The interactive electronic systems used will incorporate network and software security protocols to protect the confidentiality of patient identification and imaging data; and will include measures to safeguard the data and to ensure the integrity against intentional or unintentional corruption.

### Potential Benefits:

1. Improve access to medical care by enabling a patient to remain at home or at a site remote from the physician office.
2. Obtain the expertise of a distant specialist
3. Protect patient and clinician from an inadvertent exposure to a contagious illness

### Potential Risks:

1. Information transmitted may not be sufficient (e.g. poor resolution of images) to allow for appropriate medical decision making by the clinician.
  2. The clinician is not able to provide medical treatment to the patient through the use of telemedicine equipment nor provide or arrange for any emergency medical care that the patient may require.
  3. Delays in medical evaluation and treatment could occur due to deficiencies or failures of the equipment used by either the clinician or patient.
  4. Security protocols could fail causing a breach of privacy of personal medical information.
  5. A lack of access to complete medical records may result in adverse drug interactions or allergic reactions or other medical judgement errors.
-

**Please call our office if you would like to schedule a telemedicine visit for yourself, or your child.**

To access a prescheduled telemedicine appointment with one of our practitioners, please go to the web address for the practitioner that your appointment has been scheduled with:
